

SPREAD YOUR WEATHER AROUND!

Did you know your Integrated Sensor Suite will report to multiple consoles?

A second console would be great for:

- Workshop
- Family Room
- Basement
- Barn
- Or, let your neighbors receive your weather data in their homes too.
- Garage
- Warehouse
- Guesthouse
- Greenhouse

Is the second location in range?

Davis boasts the longest transmission range in the business. Just take your console to your neighbor's, or to the garage, to confirm it's in range. If not, don't forget that your own console retransmits, so it is still possible if your second location is closer to your console than to the sensor suite.
