DriveRight™ Specifications	Version	
	Trip	130AL
Feature	•	
Chand	500AL	
Speed Current speed in km/h or mph.		
•	Ť	
Maximum speed for each day, with time at which it occurred.	.4	
Maximum speed for each trip.	10/	. 10/
Accuracy.	± 1%	± 1%
Acceleration & Deceleration		
Current acceleration / deceleration in g's (35kmh/sec or 22mph/sec).	•	,
Number of times acceleration and deceleration limit exceeded for each day.	_	
Number of times acceleration and deceleration limit exceeded for each trip.	± 5%	± 5%
Accuracy. Distance	± 5%	± 5%
Total Distance traveled during current day in km or miles.		
Total Distance traveled during current trip in km or miles.		· ·
Odometer (requires software to set).		
Specify miles as business, personal, commute, or other.	j	
Accuracy.	± 1%	± 1%
Accuracy. Time and Date	± 1%	± 1%
Current Date in Day.Mo or Mo:Day format.		
Current Time in 24-hour or 12-hour format.		j
	·	j
First and last time vehicle moved each day.		· ·
Start and end time of each trip.		
Total time for each trip.	± 2s/d	± 2s/d
Accident Logs	± 2s/d	± 28/0
Records vehicle's speed after sudden deceleration.	~	_
Number of accident logs stored.	5	1
Number of accident logs stored. Number of seconds for which speed recorded in accident log.	20	10
Miscellaneous Features	20	10
Driver performance score	~	
Driver ID/Location ID code.	✓	
Illuminated display.	✓	✓
Alarms		
Audible alarm (optional) for speed, acceleration, and deceleration.	~	~
Visible alarm message for speed, acceleration, and deceleration.	✓	✓
Vehicle maintenance alarm (requires software to set).	✓	
Driver ID/Location code entry (requires software to set).	✓	
Security		
Owner-specified 4-digit security password protects settings and data.	~	~
Tamper indicator appears if unit is disconnected.	✓	~
Tamper indicator appears if incorrect security password entered.	✓	~
Tamper log stores time and date of last 10 tamper alerts.	✓	
Sensor Type		
Driveshaft-mounted reed switch and magnet.	~	V
VSS input	✓	
Power		
Primary: Vehicle's 12-volt battery	~	~
Backup: 3-volt CR123 Lithium battery (included).	✓	~
Battery operating time: Working (in hours).	260	260
Battery operating time: Non-working (in months).	2	2
Temperature		
Operating range: -20 °C to +85 °C (-4 °F to +185 °F).	~	~
